

ONYX BOWL

SKU: PHI1107-139

Calcite, formed over decades from the precipitation of calcium-rich water, is one of the most popular minerals in the world due to its near-unlimited list of useful applications. Usually broken down and used to make other compounds, HW Home wanted to show off this wonderful mineral in its raw, natural state with the Onyx Calcite Bowl. The entrancing blue shade of the calcite is accented by white vein patterns across the bowl, creating a pattern reminiscent of the ebb and flow of deep blue ocean waves. Each Blue Calcite Bowl is hand-carved and completely one-of-a-kind, allowing you to personalize your selection and express yourself through your decor. This item is made from natural stone. Holes and cracks may be present and will vary from piece to piece. Style and color may also have slight variations. Dimensions available upon
